1. What must be registered in Utah?

   All pesticides must be registered prior to distribution within the state.

   "Pesticide" means any: "substance or mixture of substances, including a living organism, which is intended to prevent, destroy, control, repel, attract, or mitigate any insect, rodent, nematode, snail, slug, fungus, weed, or other form of plant or animal life that is normally considered to be a pest, or that the commissioner declares to be a pest; (b) any substance or mixture of substances intended to be used as a plant regulator, defoliant, or desiccant; (c) any spray adjuvant, such as wetting agent, spreading agent, deposit builder, adhesive, or emulsifying agent with deflocculating properties of its own used with a pesticide to aid its application or effect; and (d) any other substance designated by the commissioner by rule. (Utah Code 4-14-2 (21)).
