

Percent of income spent on food has been constant in recent years

Source: USDA, Economic Research Service analysis of U.S. Department of Commerce, Bureau of Economic Analysis data.

While the chart above shows declining food prices for Americans, recent increases in food costs may alter this downward trend. Americans spend only about 10% of their annual incomes on food, compared with as much as 70% in other countries.

Variation in food prices from national average, 2004-07
