

FISH MOVEMENT REPORT FORM AND CRITERIA

This paragraph is to inform fish operators who import fish into Utah by vehicle that they are required to stop at Utah Ports of Entry upon entering Utah and show their Utah Livestock and Fish Movement Report (UL&FMR) form. Persons who import fish into Utah by airplane are also required to present their UL&FMR form at the customs office at the airport. Before any fish can enter the state a Utah Livestock and Fish Movement Report (obtained prior to transport from Fish Health Inspectors) shall be presented at the port of entry or the airport by the importer. All transport vehicles carrying aquatic animals imported into Utah or transported through Utah must possess proper documentation and approval (R58 -17-13(I)). Port of entry and customs officers forward the Livestock and Fish Movement Report to the Utah Department of Agriculture and Food for review by Fish Health Inspectors. It is our intent to prevent the entry of any diseased aquatic animals into the State of Utah. Therefore, we appreciate your cooperation in this regard. Enclosed is a copy of the Utah Livestock and Fish Movement Report. If we may be of further assistance please call (801) 538 -7046.
