Soil Applications:
Apply specified dosage as an in-furrow spray during planting directed on or below seed. Despite suppression of root-knot nematode, tuber quality may not be adequately protected. If root-knot nematode is a severe economic pest, the use of other suppression measures should also be employed.
Restrictions:

- Do not apply more than 13.7 fl oz of VELUM PRIME (0.446 lbs Fluopyram) per acre per year, regardless of formulation or method of application (soil or foliar).
- Do not apply VELUM PRIME within 7 days of harvest.
- To limit the potential for development of disease resistance to this fungicide class, do not make more than 2 sequential applications of VELUM PRIME or any Group 7-containing fungicide before rotating with a fungicide from a different Group.
- Tops or greens from treated product can be utilized for food or feed.
- The grazing of livestock in treated areas within 7 days of application is prohibited.

For MEDICAL And TRANSPORTATION Emergencies ONLY Call 24 Hours A Day 1-800-334-7577.

For PRODUCT USE Information Call 1-866-99BAYER (1-866-992-2937).

As with any crop-protection product, always read and follow label directions.
