The material you submitted has been approved for Continuing Education Units (CEUs) from the Pesticide Program at the Utah Department of Agriculture and Food (UDAF). You have received this letter, PDF format certificates and rolls for you to use and track those seeking credit towards recertification of their pesticide license. If you have a certificate you would prefer to use that has the same information on it, please do so. If you see mistakes have been made you need contact me by email with any changes - particularly with the number of CEUs awarded.

UDAF does not have a CEU tracking system. Utah Private, Commercial and Non-Commercial Pesticide Applicators must track their own CEUs by keeping the certificate given to them at events, by the event sponsor. If the certificate is lost, the applicator must obtain a replacement from the sponsor, not UDAF.

When a licensee completes the class, you provide them with a certificate. The licensee will then keep track of the certificate until they re-certify (renew) their license. If they lose their certificate you can replace the certificate if you can verify they completed the course.

DO NOT send a copy of any of the information to UDAF, unless specifically asked to do so in a unique situation.

Currently on the pesticide page of the UDAF Website we have a "Live Events Calendar" found at <https://ag.utah.gov/farmers/plants-industry/pesticides/pesticide-education/> - towards the bottom of the page. If your event does not show up, check back in two days time.

Thank you,

DREW S. MATTHEWS
Compliance Specialist IV | Continuing Education Unit Coordinator
