TO REGISTRANTS OF COMMERCIAL FEED PRODUCTS IN THE STATE OF UTAH

To assist registrants in completing application forms for the registration of commercial animal feeds, the following information is outlined.

I. **What must be registered.**

Every brand or formulation of commercial feeds, feed ingredients for mixing in feed for animals, feed additive concentrates, and supplements or premixes must be registered by the Utah Department of Agriculture when manufactured, compounded, delivered, distributed, sold, offered or exposed for sale in Utah.

II. **How to apply for registration Fertilizer/Soil Amendment products.**

- A. The registration fee for each commercial feed product is \$60.00
- B. The fee should accompany the enclosed application and be made payable to the Utah Department of Agriculture.
- C. A Product label is required for each feed registered.
- D. All registrations expire December 31st each year, and renewals not paid by that date shall be subject to a penalty of \$25.00 per registered item.

III. **Custom-Formula Blenders License.**

Custom-formula feeds are exempt from registration, but custom-formula feed mixers must obtain a license according to Utah law. Only manufacturers who formulate feeds to the specific direction of the final purchaser qualify for a custom-formula mix License. Also known as a blenders license. The custom-formula mix License fee is \$75.00 per application. If your feed manufacturing operation meets these requirements, an application for this License may be obtained from the Department of Agriculture upon request.

IV. **For your information**

All registrations expire on December 31 each year. Renewals not paid by that date shall be subject to a penalty of \$25.00 per registered product. New products are not considered as a late registration.

Your cooperation with the above items will expedite the registration of your product(s) and allow the Department to better serve you and the consumers of your products.
