

COMMUTER PERMIT for a BEEF BREEDING HERD

This agreement is for one pasture grazing season, for the cattle, duration, and premises described. Permits are issued on a case-by-case basis. Requests should be submitted to the Utah Department Agriculture and Food, Division of Animal Industry at least 14 days before the move.

A copy of the approved permit will be sent to the applicant.

CONDITIONS of AGREEMENT

I understand and agree that:

1. Cattle are from a valid beef breeding herd, established more than six months, moving for grazing purposes without change of ownership.
2. I will account for all animals on this agreement.
3. This agreement is subject to change if the risk if disease changes.
4. Failure to comply with the provisions of this agreement may result in the revocation of this permit and/or loss of use of any future pasture-to-pasture permits.
5. Cattle must return within 8 months.
6. All cattle must have official identification.
7. No trader or recently assembled cattle are in the origin herd of the animals moving.
8. All female cattle over 12 months of age entering or returning to Utah must be officially brucellosis vaccinated and bear a legible official brucellosis tattoo as evidence of the vaccination.
9. A brand certificate, in addition to the valid permit with Certificate of Veterinary Inspection (CVI), is required for all cattle within the 30 days prior to entering destination state.
10. Copies of the brand certificate, CVI and the Commuter Permit shall accompany each load or part of a shipment of cattle entering Utah.

BRAND INSPECTION REQUIREMENTS REMAIN IN EFFECT

FOR CATTLE GRAZING IN IDAHO AND WYOMING ONLY

Do you graze cattle within the boundaries of a designated brucellosis surveillance area?

Yes No

If no, nothing more is required.

If yes, the following additional requirements must be completed.

Do the cattle enter the designated brucellosis surveillance area before June 1st?

Yes No

I agree to test no less than 20% of my breeding age cattle (sexually intact cattle 12 months of age and older) for brucellosis. The negative results must be reported to the State Veterinarian's office prior to turning out for grazing and commingling with other herds. All testing must be done by November 30 of the year the permit was issued. Additional testing may be required on a case-by-case basis.

The tested cattle will include all bulls and all open, late-bred, and dry cows and breeding-age heifers, and all cull cattle. Pregnant cows will make up the balance.

I agree to send brucellosis test results to UDAF within 2 weeks of receipt. **The cattle may not be turned out for grazing or commingled with other herds until the test results have been reported to UDAF.**

I agree to officially identify all cattle regardless of age prior to entering the designated brucellosis surveillance area.

I agree to provide a copy of the brucellosis test results along with my commuter permit application for the following year.
