

Utah Department of Agriculture and Food
Water Optimization Program
FY2019 & FY2022 Annual Report Form

This report should document the water savings and crop production for the irrigation season. The purpose of this report is to verify that the project is functioning as planned and water optimization goals are being met. Please fill out this form and send it to udaf-wateroptimization@utah.gov when complete.

Project name:	
Grantee:	
Grant number:	
Location:	
Project completion date:	
Completed by:	

1. Total acre feet of water diverted during the irrigation season. May also include acre feet of water applied each watering, the number of watering per crop, and the number of waterings per season.

2. Irrigation season (dates of first and last irrigation)

3. Acres irrigated

4. Crop(s) irrigated

5. Production records: tons per acre, bushel per acre, and/or other depending on crop type
