

Utah Department of Agriculture and Food - Water Optimization Program Final Report

This report should be a representative summary of the implementation of this project. Please fill out the boxes below and attach photos as well as STEPL information if applicable. STEPL information is required for FY22 Spring and Fall application periods.

Project name:	
Application period:	
Grantee:	
Grant number:	
Location:	
Completion date:	

1. Was the project completed as described in the application? If not, what changes were made and did you receive approval for them?

2. Before, during and after photos (attached to the back of this form).

3. A description of the water made available after implementation of the project and how that water is being used.

4. A brief description of the metering and water savings.

5. If required, provide the estimated water quality load reductions (STEPL) for on farm irrigation projects or photo point monitoring, or other monitoring, for large water conveyance projects.

6. Describe the project cost, budget, etc. Did the project stay on budget? Did you have other funding sources? Please also fill out the table below.

Source	Amount
UDAF Water Optimization Contribution	\$
Other Funding	\$
In-Kind (if applicable)	\$
Total Project Cost	\$
