

VET - CVI USER GUIDE FOR ID TYPE AND ID ENTRY

GROUP TYPES:

Single

Group Type

Single

Group

Express-Single

“**Single**” entry can be used for movement of a single animal or small number of animals of different breeds, sex, color, etc. OR for an animal with 2 or more different ID’s. Default head count will always be “1” for a Single Entry. Additional Animals can be added clicking “**Save**” then adding the next animal.

Group

Group Type

Single

Group

Express-Single

“**Group**” entry is used when individual animal ID’s are not required. **Even though a total head count is listed, there must be something in the “**Value**” field – you can use your discretion with a total number of head, or a “**No ID’s Required**” Statement.

Express-Single

Group Type

Single

Group

Express-Single

“**Express Single**” will allow you to copy and paste ID’s or information into the value field when ID’s are required. Scanned EID tags (*stored in a Wand or saved spreadsheet*) can also be uploaded. NOT RECOMMENDED to use the Paperclip, as functionality is still being improved.

Quick Tip

For: Dogs, Cats, Horses, Show Animals listed individually, Sale Cattle Animals Purchased at Private Treaty Sales.

Quick Tip

For: Feeder Cattle at Livestock Markets, Farm/Ranch or Chickens, Turkeys, Swine.

Quick Tip

When multiple ID’s are required for groups of Dairy, Breeding Cattle, Sheep & Goats etc.

ID TYPE SUGGESTIONS

Please Select 1 of the Following Types of ID's

AIN

840003***** (must be 15 digits)

NAME

Animal Name and ID can be entered here

NUES 9

OCV Tags or Silver Bright Metal Tags

MANAGEMENT ID

Microchips, Scrapies Tags, Ear Notch, Leg Bands, etc

OTH

You can use this ID for ANYTHING! This selection does not require certain numbers, letters, or combinations.

Quick Tip

Sometimes the system is touchy and does not recognize the 840003.... (AIN) tags or OCV (NUES9) tags. If this happens please select "OTH" and proceed to copy & paste, or upload your ID's from a CSV file.

If ID's are in alpha and/or numerical order, you can utilize the "Range" Function -

EXPRESS ENTRY → HEAD COUNT → ID TYPE → RANGE → ENTER FIRST ID #

List your starting ID and click "Save" -

ID's will automatically populate based on the number of head you enter & take you to the next page

If ID's are being entered by COPYING & PASTING from a CSV file, Word Document or Excel Spreadsheet Use:

EXPRESS ENTRY → HEAD COUNT → ID TYPE → MANUAL → COPY & PASTE ID'S IN VALUE FIELD

ID's can be scanned directly from the AWR 300 Wand and uploaded in to VET-CVI

Please ask for instructions to complete this process

The "Value" Section does allow you to copy and paste more than 1 field at a time

Additional ID's or animal information should be listed in columns to the right of the Official ID
