

UTAH LIST OF REPORTABLE CONDITIONS FOR ANIMALS

Effective October 28, 2024

Reporting of Diseases. It shall be the responsibility of veterinary diagnostic laboratories, veterinary practitioners, livestock inspectors, and livestock owners to report immediately by phone or written statement to the Department of Agriculture and Food any of the diseases listed on the Utah Department of Agriculture and Food Reportable Disease list, available at the Utah Department of Agriculture and Food, Division of Animal Health, PO Box 146500, 350 North Redwood Road, Salt Lake City, UT 84114-6500. (Utah Administrative Code, R58-2-2 Reportable and Quarantinable Animal Diseases)

Any person who identifies symptoms of vesicular disease in livestock shall immediately report it to the department. Failure of a veterinarian licensed in this state to report a diagnosed case of vesicular disease to the department constitutes ground for the revocation of such veterinarian's license. Failure by the owner of livestock to report symptoms of vesicular disease among such owner's livestock constitutes forfeiture of the right to claim an indemnity for an animal slaughtered on account of the disease. (Utah Code, Title 04, Chapter 31, Livestock Inspection and Quarantine, Section 4-31-5., Report of vesicular disease)

All diseases listed on this page should be reported immediately to the State Veterinarian's office by phone at (801) 982-2235 or by using the following link: <https://form.jotform.com/93096124063151>
